conservative politicians and media they control refer to what they  
call soviet monopoly on sov intermediate range nuclear arms systems  
in europe, examines this with some simple arithmetic citing figures.  
ussr nevertheless considers situation as one of approximate parity.

washington, tokyo and seoul are joining forces to create milit

as many launching pads for its missiles as possible away from  
american continent. Ussr occupies clear cut position on issue,  
to prevent any nuclear war. but ussr's efforts alone are not  
enough. all nations should join struggle to prevent nuclear
